The psychology of the trading range: the area from which big moves up and down emerge

John Bollinger CFA CMT
President, EquityTrader.com

Every trader and investor will recognize themselves and their habits—good and bad—among the characters whose trading decisions are so vividly described in this book and all should discover ways of improving those trading decisions. A very timely publication.

Michael Smyrk
Global Coordinator, International Federation of Technical Analysts

Carl Gyllenram takes a new approach to looking at the workings and importance of crowd psychology in the financial markets. He shows a clear understanding of the subject providing a thoroughly useful addition to the writings on crowd psychology.

Anne Whitby, FSTA Vice Chairman, Society of Technical Analysts UK

We are an emotional species and seldom more so than when dealing with money. It is this raw human factor that creates most of the volatility in all financial and commodity markets not economics with this book, Carl Gyllenram has made an important contribution to the subject of behavioral technical analysis.

David Fuller, Global Strategist at Stockcube Research Ltd, Writer of the FullerMoney Investment Letter

trade mindfully achieve your optimum trading performance with mindfulness and cutting-edge psychology. Wiley resources and audio recordings to enhance your learning experience. An honest depiction of the challenges of trading and a clear explanation of what it takes to succeed. Trading tends to be a winner take all activity where a small number of traders are very successful while the majority either lose money or generate relatively small profits. In the mental strategies of top traders, author Ari Kiev identifies and analyzes the characteristics of successful traders and shows you how to cultivate these same characteristics. Successful trading requires an unusual and sometimes contradictory blend of intellectual and psychological abilities including the willingness to take risks but in a very controlled manner, the discipline to develop high conviction trading ideas in the face of unpredictable markets and incomplete information as well as a strong drive to win but also accept failure. Here you'll discover how to achieve all this and much more. This book provides advice and solutions for traders struggling with today's volatile and stressful markets. Authoritatively identifies key mental strategies of top traders written by Ari Kiev, a highly respected figure in the professional trading community. Analysis is supported by comments from contemporary traders and portfolio managers, many of whom struggled with the markets of 2008. Designed with the serious trader in mind, this book will put you in a better position to excel in today's tumultuous markets.

the markets and that constant is human psychology in the psychology of finance readers are shown how the
market's characteristics that arise can be interpreted and learnt from this revised edition contains new examples
and updates to charts there is also a summary of the characteristics of each phase of the equity market bear
bottom rise bull peak and decline it includes an appendix covering the history of economic psychology written in
an extremely readable and enjoyable style it shows how psychology can drive movements in the prices of
financial assets breakdown key market phenomena eg irrational attitude changes in the individual and their
indicators successful trader mark whistler draws from the fields of psychology spirituality and philosophy to
emphasize how self honesty self esteem emotional balance and confidence form the foundation of successful
trading he demonstrates how adherence to a small number of core principles vastly improves chances of
success and shares interviews from top traders to exemplify his point that even the most successful traders have
had to overcome setbacks test your trading knowledge and skills without risking any money you may read the
best trading book but how much of that knowledge will you retain a week later this is why you need this study
guide for the new trading for a living it ll give you a firmer grasp of the essential trading rules and skills this study
guide based on the bestselling trading book of all time was created by its author to help you master the key
points of his classic book the study guide s 170 multiple choice questions are divided into 11 chapters each with
trade mindfully achieve your optimum trading performance with mindfulness and cutting-edge psychology. Wiley

its own rating scale they cover the entire range of trading topics from psychology to system design from risk management to becoming an organized trader. Each question is linked to a specific chapter in the main book. While the answers section functions like a mini textbook, it doesn't just tell you that A is right or B is wrong. It provides extensive comments on both the correct and incorrect answers. This study guide also contains 17 charts that challenge you to recognize various trading signals and patterns. Everything is designed to help you become a better trader. Consider getting two books as a package: the study guide and the new trading for a living. They're designed to work together as a unique educational tool. The study guide for the new trading for a living is a valuable resource for any trader who wants to achieve sustainable market success.

The psychology of finance by Lars Tvede approaches this fascinating area from the belief that psychology can be used to explain important aspects of market behaviour, including some aspects of common technical analysis. Without giving too much away, Lars Tvede believes that there is an inherent structure in price movements depending on the type of stock or market. One is investigating. The author's style is very hands-on, which results in an extremely readable and enjoyable account of the movements in prices of financial assets. Analysts, traders, and bankers will find this book essential reading. Economists and the personal investor will also find the psychology of finance interesting.

finance investment psychological aspects

this book demystifies the foreign exchange market by focusing on the people who comprise it drawing on the expertise of the very professionals whose decisions help shape the market. thomas oberlechner describes the highly interdependent relationship between financial decision makers and news providers showing that the assumption that the foreign exchange market is purely economic and rational has to be replaced by a more complex market psychology. one of the financial world’s most respected experts on the psychology of risk provides a revolutionary risk management model. over the past three decades investors have adopted all varieties of complex quantitative systems for quantifying and managing risk yet sophisticated investors and money managers continue to suffer record losses in today’s increasingly volatile markets. this book bridges the gap between investor psychology and quantitative risk management with a revolutionary risk management program that virtually any trader or investor can easily adapt to their goals and personalities using numerous fascinating real life case studies. dr. kiev illustrates the various psychological and emotional traps to which even the savviest investors can fall victim. he develops a dynamic new risk management model that combines quantitative models and money management techniques. he also provides rigorous guidelines that will help readers answer such crucial questions as how much should i trade, how much risk can i handle and when should i get out. the best traders in the world know that being mentally prepared is absolutely essential to compete in...
Trade mindfully achieve your optimum trading performance with mindfulness and cutting-edge psychology. Wiley

Today's markets without a firm understanding of the psychology of trading, even the best stock picker will fail. A trading athlete gives specific instruction on how new and seasoned traders can keep themselves at the top of their mental game. Tim Bourquin, cofounder of TraderInterviews.com and the Online Trading Expo, this book is great training camp for online traders. Doug and Shane will provide the knowledge and motivation to help you become a successful trader. Jonathan Markowitz, partner of SMW Trading Co. Inc. Traders just like athletes face tremendous pressure, stress, and expectations that would crush the ordinary unprepared individual. The trading athlete utilizes sport psychology strategies to provide you with the knowledge, confidence, and discipline needed to succeed and profit in the sink or swim world of online trading. Using real-world examples of athletes and online traders, this book will help you reach the peak of your online trading performance with in-depth analysis of building confidence in good times and bad handling losses by examining your methods, focusing and maintaining concentration, playing the game one trade at a time through sport psychology strategies exemplified by John Elway, Arthur Ashe, and other athletes. You will finally begin to trade and survive in the big leagues. Today's market participants have a myriad of tools at their disposal yet the success rate is that of old. 80 to 90% of traders fail to achieve their financial goals. This book shows traders how to get their investment act together. It covers in detail the three requirements needed for success: winning psychology, effective money management, and a written
trade mindfully achieve your optimum trading performance with mindfulness and cutting-edge psychology wiley

trading plan with an edge the nature of trends also provides unique tools for example the midas tool that provides low risk trade entry by telling the trader the level at which an entry may be safely effected finally the book provides the rule of 3 to manage a trade these rules allow the trader to take profits and hold on for long term profits without increasing risk markets in profile explores the confluence of three disparate philosophical frameworks the market profile behavioral finance and neuroeconomics in order to present a unified theory of how markets work the market profile is an ever evolving multidimensional graphic that gives visual form to the market s continuing auction process revealing the myriad underlying dynamics that influence market activity behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by rationality when making investment decisions and neuroeconomics is the study of how investor psychology permeates and affects the financial markets mr dalton explicates the ways in which irrational human behavior influences the market s natural auction process creating frequently predictable market structure which results in opportunities for investors to ameliorate risk the book will improve investors ability to interpret change in markets enabling better more confident investment decisions successful trading is based on three m s mind method and money trading
trade mindfully achieve your optimum trading performance with mindfulness and cutting-edge psychology wiley

for a living helps you master all of those three areas: how to become a cool, calm, and collected trader, how to profit from reading the behavior of the market crowd, how to use a computer to find good trades, how to develop a powerful trading system, how to find the trades with the best odds of success, how to find entry and exit points, how to set stops and take profits.

trading for a living helps you discipline your mind, shows you the methods for trading the markets, and shows you how to manage money in your trading accounts so that no string of losses can kick you out of the game. To help you profit even more from the ideas in trading for a living, look for the companion volume: study guide for trading for a living. It asks over 200 multiple choice questions with answers and 11 rating scales for sharpening your trading skills.

For example, question: Markets rise when there are more buyers than sellers, buyers are more aggressive than sellers, sellers are afraid and demand a premium, more shares or contracts are bought than sold. I and II, II and III, II and IV, III and IV. Answer: B, II and III.

Every change in price reflects what happens in the battle between bulls and bears. Markets rise when bulls feel more strongly than bears, they rally when buyers are confident and sellers demand a premium for participating in the game that is going against them. There is a buyer and a seller behind every transaction, the number of stocks or futures bought and sold is equal by definition.

psychologist Mike Elvin explores the complex relationship between human behaviour patterns and the markets, offering the reader a context in which to assess their own strengths and weaknesses as investors. The book offers an apposite and uncomplicated system of skills development in the form of competences and competencies that can be applied anywhere along the continuum from casual investor to full-time day trader. Elvin presents a comprehensive model of trading competence, the MOT as well as the concepts of analysis and refutation, the paramountcy principle, and self-sabotaging behaviours such as the Santa Claus syndrome and Bohica effect. Areas covered include emotions—Are they functional or disabling? How do the mechanisms of fear, greed, and panic work? Motivation and perception—How do belief paradigms affect perception and performance? What perceptual errors influence decisions to the trader’s detriment? Information processing and risk assessment—How does information overload affect stress? How does stress affect investment decisions? Technological and mathematical anxiety—Why do we avoid learning the skills we most need? What levels of ability are required? Can psychological and biological theories assist in our understanding of investor performance?

Come behind closed doors and see real trades made by real traders. Dr. Alexander Elder leads you into 16 trading rooms where you meet traders who open up their diaries and show you their trades. Some of them manage money; others trade for themselves. Some trade for a living; others are on the semi-professional level. All are totally serious and honest in sharing their trades with those who would like to learn. You will meet American and international traders who trade stocks, futures, and options using a variety of methods. All are normally very private, but now thanks to their relationships with Dr. Elder, you can see exactly how these traders decide to enter and exit trades. Each chapter illustrates an entry and an exit for two trades with comments by Dr. Elder. With this book as your guide, you can get closer to mastering the key themes of trading psychology, tactics, risk control, record keeping, and the decision-making process. The companion study guide is filled with striking insights and practical advice, allowing you to test your knowledge and reinforce the principles outlined in entries and exits. Some of the most successful traders in the US, Australia, and Asia share their secrets with you. Following on the heels of the bestselling volume I, The Wiley

**Psychological Analysis 2021-12-29**

beat the market by using psychological analysis for investing and trading under any conditions conventional wisdom tells us that people are rational and make rational decisions with their money but that s simply not true considering most people fail to beat the market conventional wisdom also tells us that there are two primary ways to approach the market technical and fundamental analysis again that is not true because if it were everyone would be rich think about it how many times have you seen stocks with poor fundamentals go up or
stocks with great technicals go down it's obvious that something is missing author adam sarhan founder and ceo of 50 park investments developed a new approach titled psychological analysis pa coined by the author the term teaches you how to make rational not emotional decisions with your money and shows you how to analyze both the individual and collective market mindset at a particular time based on the behavior and decision making of people in the real world psychological analysis is designed to tip the odds of success in your favor after studying every major economic and market cycle going back to the 3rd century the author explains that human nature is the one constant and tells you what actually drives markets psychological analysis is responsible for major and minor market moves today tomorrow and all throughout history adam shows you that there are more factors that influence price than just fundamental or technical analysis and how to bring out the smart money superhero inside you this invaluable guide helps you make rational not emotional decisions with your money especially when you are under pressure understand the psyche of the market so you can learn how to join the smart money circle and consistently take money out generate above average returns in all market environments incorporate psychological analysis into your overall trading and investing strategy so you can make smarter decisions on and off wall street psychological analysis how to outsmart the market one trade at a time is a must have resource for traders investors finance professionals and anyone who wants to profit regardless of market
conditions

The Daily Trading Coach 2009-03-23

praise for the daily trading coach a great book simply written motivational with unique content that leads any trader novice or experienced along the path of self coaching this is by far dr steenbarger s best book and a must have addition to any trader s bookshelf i ll certainly be recommending it to all my friends ray barros ceo ray barros trading group dr steenbarger has been helping traders help themselves for many years simply put this book is a must read for anyone who desires to achieve great success in the market charles e kirk the kirk report dr brett as he is affectionately known by his blog readers has assembled a practical guide to self coaching in this excellent book the strategies he outlines are further enhanced with numerous resources and exercises for the reader to refer to and keep the principles fresh i enthusiastically encourage anyone interested in bettering their trading and investing to read this book and keep it on their desk as a constant source of learning brian shannon alphatrends net author of technical analysis using multiple timeframes dr brett has distilled his years of experience as both a trader and a psychologist coach into the 101 practical lessons found in the daily trading
coach those lessons provide effective strategies for coping with the stumbling blocks that traders often face. this book should be a cornerstone of any serious trader’s library. michael seneadza, equities trader and blogger at tradermike.net

**Trading With Crowd Psychology 2000-10-30**

let the sound of the crowd help you create a successful trading plan. praise for carl gyllenram and trading with crowd psychology investing is first and foremost a psychological process and good market technicians are really psychologists. mr. gyllenram understands this and his book offers deep insight into the psychology of the trading range—the area from which big moves up and down emerge. john bollinger, cfa, cmt, president, equitytrader.com every trader and investor will recognize themselves and their habits, good and bad, among the characters whose trading decisions are so vividly described in this book and all should discover ways of improving those trading decisions. a very timely publication. michael smyrk, global coordinator, international federation of technical analysts.

Carl Gyllenram takes a new approach to looking at the workings and importance of crowd psychology in the financial markets. He shows a clear understanding of the subject providing a thoroughly useful addition to the
writings on crowd psychology anne whitbyfsta vice chairman society of technical analysts uk we are an emotional species and seldom more so than when dealing with money it is this raw human factor that creates most of the volatility in all financial and commodity markets not economics with this book carl gyllenram has made an important contribution to the subject of behavioral technical analysis david fuller global strategist at stockcube research ltd writer of the fullermoney investment letter

The Psychology of Finance  1999-10-22

dr psychology of finance lars tvede the author approaches this fascinating area from the belief that psychology can be used to explain important aspects of market behaviour including some aspects of common technical analysis without giving too much away lars tvede believes that there is an inherent structure in price movements depending on the type of stock or market one is investigating the author s style is very hands on which results in an extremely readable and enjoyable account of the movements in prices of financial assets analysts traders and bankers will find this book essential reading economists and the personal investor will also find the psychology of finance interesting finance investment psychological aspects
The Psychology of the Foreign Exchange Market 2004-11-30

this book demystifies the foreign exchange market by focusing on the people who comprise it drawing on the expertise of the very professionals whose decisions help shape the market. Thomas Oberlechner describes the highly interdependent relationship between financial decision makers and news providers showing that the assumption that the foreign exchange market is purely economic and rational has to be replaced by a more complex market psychology.

The Psychology of Risk 2002-04-19

one of the financial world's most respected experts on the psychology of risk provides a revolutionary risk management model. Over the past three decades investors have adopted all varieties of complex quantitative systems for quantifying and managing risk yet sophisticated investors and money managers continue to suffer record losses in today's increasingly volatile markets. This book bridges the gap between investor psychology and quantitative risk management with a revolutionary risk management program that virtually any trader or investor...
can easily adapt to their goals and personalities using numerous fascinating real life case studies dr kiev illustrates the various psychological and emotional traps to which even the savviest investors can fall victim he develops a dynamic new risk management model that combines quantitative models and money management techniques he also provides rigorous guidelines that will help readers answer such crucial questions as how much should i trade how much risk can i handle and when should i get out

The Trading Athlete 2001-08-30

the best traders in the world know that being mentally prepared is absolutely essential to compete in today s markets without a firm understanding of the psychology of trading even the best stock picker will fail the trading athlete gives specific instruction on how new and seasoned traders can keep themselves at the top of their mental game tim bourquin cofounder traderinterivews com and the online trading expo this book is a great training camp for online traders doug and shane will provide the knowledge and motivation to help you become a successful trader jonathan markowitz partner smw trading co inc traders just like athletes face tremendous pressure stress and expectations that would crush the ordinary unprepared individual the trading athlete utilizes

**The Nature of Trends 2011-11-16**

today s market participants have a myriad of tools at their disposal yet the success rate is that of old 80 to 90 of traders fail to achieve their financial goals this book shows traders how to get their investment act together it covers in detail the three requirements needed for success winning psychology effective money management and a written trading plan with an edge the nature of trends also provides unique tools for example the midas tool that provide low risk trade entry by telling the trader the level at which an entry may be safely effected finally the book provides the rule of 3 to manage a trade these rules allow the trader to take profits and hold on for long
term profits without increasing risk

Markets in Profile 2011-01-11

markets in profile explores the confluence of three disparate philosophical frameworks the market profile behavioral finance and neuroeconomics in order to present a unified theory of how markets work the market profile is an ever evolving multidimensional graphic that gives visual form to the market's continuing auction process revealing the myriad underlying dynamics that influence market activity behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by rationality when making investment decisions and neuroeconomics is the study of how investor psychology permeates and affects the financial markets mr dalton explicates the ways in which irrational human behavior influences the
market s natural auction process creating frequently predictable market structure which results in opportunities for
investors to ameliorate risk the book will improve investors ability to interpret change in markets enabling better
more confident investment decisions

Study Guide for Trading for a Living: Psychology, Trading Tactics, Money
Management 1993-04-16

successful trading is based on three m s mind method and money trading for a living helps you master all of
those three areas how to become a cool calm and collected trader how to profit from reading the behavior of the
market crowd how to use a computer to find good trades how to develop a powerful trading system how to find
the trades with the best odds of success how to find entry and exit points set stops and take profits trading for a
living helps you discipline your mind shows you the methods for trading the markets and shows you how to
manage money in your trading accounts so that no string of losses can kick you out of the game to help you
profit even more from the ideas in trading for a living look for the companion volume study guide for trading for a
living it asks over 200 multiple choice questions with answers and 11 rating scales for sharpening your trading
skills for example question markets rise when there are more buyers than sellers buyers are more aggressive than sellers sellers are afraid and demand a premium more shares or contracts are bought than sold i and ii and iii and iv answer b ii and iii every change in price reflects what happens in the battle between bulls and bears markets rise when bulls feel more strongly than bears they rally when buyers are confident and sellers demand a premium for participating in the game that is going against them there is a buyer and a seller behind every transaction the number of stocks or futures bought and sold is equal by definition

Entries and Exits 2006-06-29

come behind closed doors and see real trades made by real traders. Dr. Alexander Elder leads you into 16 trading rooms where you meet traders who open up their diaries and show you their trades. Some of them manage money, others trade for themselves. Some trade for a living, others are on the semi-professional level. All are totally serious and honest in sharing their trades with those who would like to learn. You will meet American and international traders who trade stocks, futures, and options using a variety of methods. All are normally very private, but now thanks to their relationships with Dr. Elder, you can see exactly how these traders decide to enter and exit trades. Each chapter illustrates an entry and an exit for two trades with comments by Dr. Elder. With this book as your guide, you can get closer to mastering the key themes of trading psychology, tactics, risk control, record...
keeping and the decision making process the companion study guide is filled with striking insights and practical advice allowing you to test your knowledge and reinforce the principles outlined in entries exits
