Creating Global Bonds, Grade 12 2023-03-21

If you could challenge your twelfth grade students to explore energy consumption and climate change in their own communities and connect that information with other communities around the world, then you can create global bonds. In this volume of the STEM Road Map curriculum series, you can create global bonds outlines a journey that will steer your students toward authentic problem solving while grounding them in integrated STEM disciplines like the other volumes in the series. This book is designed to meet the growing need to infuse real-world learning into K-12 classrooms. This interdisciplinary three-lesson module uses project and problem-based learning to help students create an action plan to address issues of energy consumption and climate change. Exploring the topic at both local and global levels, students will gather data on energy consumption and climate change in their communities, partnering with international students to undertake problem-solving activities that examine issues that are both common and unique to each community. To support this goal, students will do the following: identify modes and trends in energy consumption in their communities and regions, analyze how these patterns of energy consumption impact climate change, and partner with students internationally to coordinate efforts to synthesize energy consumption data and discern connections across contexts. Taking the form of an international blog design, present an action plan to address issues of energy consumption and climate change, ultimately delivering a white paper and interactive web-based presentation on local and international issues of energy consumption and climate change.

Research for Educational Change 2016-06-17

Research for educational change presents ways in which educational research can fulfill its commitments to educational practice, focusing its discussion within the context of mathematics education. It argues that while research generated insights can have beneficial effects on learning and teaching, the question of how to turn research into educational improvement is far from evident. Here, the book discusses how learning and teaching are hindered by poverty and social injustice in the first part of the book. Four teams of researchers use different methodologies while analyzing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about how to address issues of energy consumption and climate change ultimately delivering a white paper and interactive web-based presentation on local and international issues of energy consumption and climate change. This book is anchored in the Next Generation Science Standards, the Common Core State Standards, and the Framework for 21st Century Learning.

Education during the Time of the Revolution in Egypt 2017-11-13

since the 25th january 2011 revolution egyptians experienced and engaged in a daily debate controversially some argued that the conflict and revolts in egypt and the arab region were neither coincidental nor the result of a domino effect of collective actions by oppressed people against autocratic regimes rather these revolts were the result of mobilization efforts made over decades by several activist groups as well as national and international non governmental organizations contrary to this view others claim that despite the rapid economic growth of egypt in the 2000s there was a wide gap in the distribution of wealth and economic return which left the majority of egyptians suffering from poverty and high rate of unemployment especially among youth obviously while national and international economic and political dynamics dominated the daily debate education remains the forgotten arena amidst conflict with the exacerbation of conflict between militant extremists and modern states in the region and most recently in many european countries it became more important than ever before to understand the dialectics of education in conflict in different local contexts starting in this book by the egyptian context the book focuses on education in egypt during the time of the revolution as perceived by university students youth activists educational professionals government officials and civil society organizations its chapters reveal the tension contradiction and or coherence among different players as related to their respective role in education for civic engagement national identity global citizenship peace building teacher professional development and women’s and students empowerment the book illustrates the dialectics of education in conflict by articulating diverse meanings and perspectives given by
egyptian stakeholders when describing their actions and reality ies during the time of the revolution and its aftermath

**When Political Transitions Work 2018-07-26**

The peaceful end of apartheid in South Africa was a monumental event in late twentieth-century history. A racist regime built upon a foundation of colonialist exploitation, South Africa had become by that point a tinderbox suffused with day-to-day violence and political extremism. Yet, all sides two decades later, it was a stable democracy with a growing economy. How did such a deeply divided, conflicted society manage this remarkable transition? When political transitions work, Fanie du Toit, who has been a participant and close observer in post-conflict developments throughout Africa for decades, offers a new theory for why South Africa’s reconciliation worked and why its lessons remain relevant for other nations emerging from civil conflicts. He uses reconciliation as a framework for political transition and seeks to answer three key questions: How do the reconciliation processes begin? How can political transitions result in inclusive and fair institutional change? To what extent does reconciliation change the way a society functions looking at South Africa one of reconciliation’s most celebrated cases, du Toit shows that the key ingredient to successful reconciliations is acknowledging the centrality of relationships. He further develops his own theoretical approach to reconciliation as interdependence, the idea that reconciliation is the result of an integrated process of courageous leadership, fair and inclusive institutions, and social change built toward a mutual goal of prosperity. As du Toit conveys, the motivation for reconciliation is the long-term well-being of one’s own community as well as that of enemy groups without ensuring the conditions in which one’s enemy can flourish, one’s own community is unlikely to prosper sustainably.

This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of English as the world’s lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the existing global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the bilingual multilingual educational paradigm across nations and all levels of educational systems.

Inquiry-Based Science in the Primary Classroom 2023-06-20

this comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics the neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings now it s time to bring the results from the laboratory to the classroom apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments it also provides insights to translate research knowledge into public policies in order to address socioeconomic issues and it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world all of this makes the international handbook of mathematical learning
difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

This book explores the unique experiences of a sister school network in Canada and China contextualized through the lens of the reciprocal learning project which supports the relationship between a school network and teacher education exchange program of two countries. Huang uses theoretical viewpoints from teacher learning and comparative education research to analyze and interpret what has happened in the emerging cross cultural school network. The book juxtaposes teacher learning and comparative education research from Shanghai and Ontario as teachers in the two places interact and provides detailed descriptions of teacher collaboration to show how these collaborations were initiated, developed, and sustained. As well as the impact brought about from these collaborations, the book offers a unique opportunity to examine how Canadian and Chinese teachers receive and react to opportunities of cross cultural collaboration and learning.

This handbook provides a concise overview of special education services in countries across the world using the article on education in the United Nations Convention on the Rights of Persons with Disabilities as the analytical frame. The Praeger International Handbook of Special Education presents a concise and clear overview of special education services in more than 70 countries across the world using the article on education in the United Nations Convention on the Rights of Persons with Disabilities as the analytical frame. Each chapter offers information about the country in general followed by sections on the public education system, the private education system, the special education system, teacher training requirements, and barriers to and promising trends in inclusive and special education. The volumes and chapters are organized by the United Nations geoscheme with Volume 1 including an overview of the volumes and chapters on countries in the Americas, Volume 2 addressing countries from Europe and Africa, and Volume 3 focusing on countries in Asia and Oceania. This is the most complete exploration of the delivery of supports and services to children and youth with disabilities across the globe available. The volumes do not compare among or between countries but rather provide a baseline for understanding current special education practices and their relationship with general education and inclusive practices across the globe. Readers will come away with an in-depth understanding of what is happening with regard to the implementation of special education services and Article 24 of the Convention for the rights of people with disabilities. This valuable reference set serves researchers, graduate students, and policymakers in special and general education as well as professionals focused on issues of education worldwide and scholars focused on international special education. As such, this handbook will be an important reference source for university libraries, professional associations, and policy entities.
