The achievement gaps in science and the under representation of minorities in science related fields have long been a concern of the nation. This book examines the roots of this problem by providing a comprehensive state of the field analysis and synthesis of current research on science education for minority students. Research from a range of theoretical and methodological perspectives is brought to bear on the question of how and why our nation’s schools have failed to provide equitable learning opportunities with all students in science education. At 3:17 p.m. on March 18, 1937, a natural gas leak beneath the London Junior Senior High School in the oil boomtown of New London, Texas created a lethal mixture of gas and oxygen in the school’s basement. The odorless, colorless gas went undetected until the flip of an electrical switch triggered a colossal blast. The two-story school, one of the nation’s most modern, disintegrated burying everyone under a vast pile of rubble and debris. More than 300 students and teachers were killed and hundreds more were injured as the seventy-fifth anniversary of...
the catastrophe approaches it remains the deadliest school disaster in U.S. history. Few however know of this historic tragedy and no book until now has chronicled the explosion its cause, its victims, and the aftermath. Gone at 3:17 is a true story of what can happen when school officials make bad decisions to save money on heating the school building. The trustees had authorized workers to tap into a pipeline carrying waste natural gas produced by a gasoline refinery. The explosion led to laws that now require gas companies to add the familiar pungent odor. The knowledge that the tragedy could have been prevented added immeasurably to the heartbreak experienced by the survivors and the victims’ families. The town would never be the same.

Using interviews, testimony from survivors, and archival newspaper files, Gone at 3:17 puts readers inside the shop class to witness the spark that ignited the gas. Many of those interviewed during twenty years of research are no longer living, but their acts of heroism and stories of survival live on in this meticulously documented and extensively illustrated book.

If we want to really understand our students so that we can optimize instruction for them, we must think of each individual student as distinctive and irreplaceable. From this core principle springs the radically humane framework for meaningful teaching that is the subject of this book. Powerful Student Care (PSC) authors Grant A. Chandler and Kathleen M. Budge developed this one-of-a-kind system for catering to the unique life circumstances of every child to help all teachers grow in their practice and all students to flourish. Based on voluminous research as well as the authors’ own experience as seasoned educators, PSC offers teachers a foolproof way to ensure that regardless of label or socioeconomic profile, each one of their students receives the support they need.
