exploring these important topics first published in 1905 this volume on the cotton industry emerged in the context of joseph chamberlain’s proposed tariff reform and provided an academic perspective on the industry the author s j chapman was an established historian of lancashire cotton and produced this volume as an elementary introduction to the economics of the industry and some of its issues he discusses the raw material industrial and commercial history british trade and foreign tariffs exploring the historical influence of tariffs on the cotton trade and including two articles reprinted from the manchester guardian the newspaper was strongly affiliated with the liberal party who would win a landslide victory the following year based in part on their opposition to tariff reform the savage and modern self examines the representations of north american indians in novels poetry plays and material culture from eighteenth century britain author robbie richardson argues that depictions of indians in british literature were used to critique and articulate evolving ideas about consumerism colonialism britishness and ultimately the modern self over the course of the century considering the ways in which british writers represented contact between britons and indians both at home and abroad the author shows how these sites of contact moved from a self affirmation of british authority earlier in the century to a mutual corruption to a desire to appropriate perceived traits of indianess looking at texts exclusively produced in britain the savage and modern self reveals that the modern finds definition through imagined scenes of cultural contact by the end of the century richardson concludes the hybrid indian brition emerging in literature and visual culture exemplifies a form of modern british masculinity long before the boston tea party where colonists staged a revolutionary act by masquerading as indians people looked to native americans for the symbols imagery and acts that showed what it meant to be american and for just as long observers have largely overlooked the role that native peoples themselves played in creating and enacting the indian performances appropriated by european americans it is precisely this neglected notion of native americans playing indian that native acts explores these essays by historians literary critics anthropologists and folklorists
provide the first broadly based chronicle of the performance of indianness by
natives in North America from the seventeenth through the early nineteenth
century. The authors' careful and imaginative analysis of historical documents
and performative traditions reveals an intricate history of intercultural
exchange. In sum, Native acts challenge any simple understanding of cultural
authenticity even as they celebrate the dynamic role of performance in the
American Indian pursuit of self-determination. In this collection, Indian peoples
emerge as active, vocal, embodied participants in cultural encounters whose
performance powerfully shaped the course of early American history. Those
who are dealing with antitrust issues, the book is very useful, and if somebody
has already acquired the basic economic principles underlying antitrust
regimes, one should read this book. Pal Bela Szilágyi and Dorina Juhasz's
Erasmus Law and Economics Review. The book is quite often an interesting read
and provokes plenty of unexpected thoughts. Scholars familiar with the public
choice literature and American antitrust law could benefit from the
stimulating questions McNutt raises throughout and for the wealth of
examples from European competition law. Scott E. Graves' The Law and Politics
Book Review. Patrick McNutt's book is a brilliant exposé of the interaction
between law, economics, and antitrust. The author, an economist and
distinguished regulator, handles both the legal and economic material deftly; it
is provocative, particularly when dealing with issues such as the efficiency of
competition and the effectiveness of antitrust rules. His case studies are
particularly compelling. The book is written with huge flair and great
learning; it combines theoretical and practical considerations. The comparative
coverage is excellent; a must-read for all interested in law and economics.
Antitrust specialists will discover many novel and valid insights. David O.
Keeffe, University College London, UK, and College of Europe, Bruges, Belgium.
This book continually stimulates the reader to think about the issues in non
standard and illuminating ways. Following new and significant directions yet
the discussion always is authoritatively grounded in the author's extensive
knowledge of the pertinent law and the relevant economic analysis. William J.
Baumol, New York University, US, and Princeton University, US, Professor.
McNutt provides a refreshing and different perspective on the important fundamental issues underlying competition law and policy. Barry E. Hawk of Skadden Arps Slate Meagher Flom LLP in this accessible yet rigorous textbook presents a clear and refreshing approach to a wide range of topics in law economics and antitrust. The issues covered include duty and obligation contracting, liability, property rights, efficient entry, compensation, oligopoly pricing issues, and strategic antitrust and merger analysis. Using a selection of case studies where appropriate and examples based in game theory, the book examines these issues from both a law and economics and a microeconomics perspective. Emphasis is placed on a thorough assessment of the economic and legal arguments, blending the rigours of microeconomic analysis with common law standards. The analysis contained in the book will not only review and indeed adapt neoclassical economic analysis but will also apply some of the methodology from the relatively new paradigm known as law and economics to many of the issues. The book also addresses the increasing overlap between emerging approaches in public choice and in law and economics. Practitioners in competition law and regulation of utilities will draw great value from this original and pertinent volume as will scholars in the areas of regulation, competition, regulation, competition policy, and law and economics.

*Comprehensive Criminal Procedure, Fifth Edition* 1878 including contributions from such figures as Douglas Irwin James Foreman Peck Kevin O'Rourke and Max Stefan Schulze. This key book summarizes the recent empirical research carried out on the issue of the classical period of trade protectionism. It provides a basis for revising widely held views on the standard effects of tariffs on economic structures and progress as well as a historical perspective on recent developments. Long-held views on modern trade policies have been challenged by the introduction of recent theoretical developments in international economics and in measurement techniques brought about in the 1960s and 1970s. One question in particular has attracted attention and has contributed to the bringing to light of a number of previously ignored measurement and interpretation problems. The assessment of French and British nineteenth-century trade policies. This noteworthy volume examines the theoretical and practical problems associated with the assessment and measurement of the direct impact of tariffs, prohibitions, and quotas on domestic prices, output structure, and competitiveness. The contributors also examine the direct and long-run consequences of protectionist measures on particular economies utilizing evidence from in-depth investigations of trade statistics as well as best practice statistical techniques such as effective protection elasticity of demand and revealed comparative advantage.

**The Singapore and Straits Directory** 1990 First published in 1905, this volume on the cotton industry emerged in the context of Joseph Chamberlain's proposed tariff reform and provided an academic perspective on the industry. The author, S.J. Chapman, was an established historian of Lancashire cotton and produced this volume as an elementary introduction to the economics of the industry and some of its issues. He discusses the raw material, industrial and commercial history, British trade, and foreign tariffs, exploring the historical influence of tariffs on the cotton trade and including two articles reprinted from the Manchester Guardian. The newspaper was strongly affiliated with the Liberal Party, who would win a landslide victory the following year based in part on their opposition to tariff reform.

**Cutting for All!** 1990 The Savage and Modern Self examines the representations of North American Indians in novels, poetry, plays, and material culture from the eighteenth century. British author Robbie Richardson argues that depictions of Indians in British literature were used to critique and articulate evolving ideas about consumerism, colonialism, Britishness, and ultimately the modern self. Over the course of the century, considering the ways in which British writers represented contact between Britons and Indians both at home and abroad, the author shows how these sites of contact moved from a self-affirmation of British authority earlier in the century to a mutual corruption to a desire to appropriate perceived traits of Indianess. Looking at texts exclusively produced in Britain, The Savage and Modern Self reveals that the modern finds definition through imagined scenes of cultural contact. By the end of the century, Richardson concludes the hybrid Indian Briton emerging...
