with the advance of evidence based practice has come the publication of numerous dense volumes reviewing the theoretical and empirical components of child and adolescent treatment. There are also a variety of detailed treatment manuals that describe the step by step procedures to guide ongoing research and practice. The second edition of Craig Winston Lecroy's Handbook of Evidence Based Child and Adolescent Treatment Manuals is a forceful combination of the two approaches as he gathers fifteen varied treatment manuals and brief summaries of the research supporting each to ensure that practitioners will truly understand how to implement the treatments they are using. Completely revised and expanded edition of the handbook's first edition, this is an essential guide to some of the best programs for helping children and teens. Each chapter begins with an explanatory section that discusses the theoretical and empirical underpinnings of the programs. The treatment manual follows, leading readers through sessions with specific details about conducting the treatment that have been refined and improved through extensive testing and research. Organized into three sections—the major clinical disorders, social problems confronting children and teens, and preventive interventions—the handbook brings together some of the most esteemed researcher practitioners in the child and adolescent field.

Of all mental health disorders, schizophrenia remains the most pervasive, bewildering, and resistant to treatment in addition to its profound effect on the patient. The illness can be equally devastating to the family. A problem that is compounded by the family’s frequent role as provider of primary care. Psychoeducation systematically takes into account the family’s role in providing care and the importance of supporting this system, which in turn supports the patient. It is a method of care that remains focused on the family while making use of biological, psychological, and vocational interventions. Schizophrenia in the family represents the first treatment manual based on the psychoeducational model in conjunction with maintenance chemotherapy. Psychoeducation reduces the emotional intensity of the patient’s environment and creates a sense of continuous care using illustrative case examples. This how-to-do-it manual demonstrates methods to...
increase treatment compliance sustain patients in the community gradually integrate patients into familial social and vocational roles specifically they explain how to develop a productive treatment alliance with the patient and the family and how to share with them concrete knowledge about the illness as well as management techniques for handling its difficulties they provide recommendations for managing the critical early outpatient phase of treatment and suggest methods for promoting the ability to work and socialize outside the home additionally they describe how to conduct the final stages of treatment when patients may be moving into maintenance sessions other treatment methods or toward termination the book concludes with a helpful chapter on training issues and the application of the psychoeducational model to other mental health systems
