a literature or narrative review is a comprehensive review and analysis of the published literature on a specific topic or research question. The literature that is reviewed contains books, articles, academic articles, conference proceedings, association papers, and dissertations.

a literature review is a review and synthesis of existing research on a topic or research question. A literature review is meant to analyze the scholarly literature, make connections across writings, and identify strengths, weaknesses, trends, and missing conversations.

the main and fundamental purpose of writing a review is to create a readable synthesis of the best resources available in the literature for an important research question or a current area of research. Although the idea of writing a review is attractive, it is important to spend time identifying the important questions.

introduction a systematic review collects all possible studies related to a given topic and design and reviews and analyzes their results. During the systematic review process, the quality of studies is evaluated, and a statistical meta-analysis of the study results is conducted on the basis of their quality.

there are many types of reviews, including narrative reviews, scoping reviews, systematic reviews, integrative reviews, umbrella reviews, rapid reviews, and others. It is not always straightforward to choose which type of review to conduct.
