The accountability of armed non state actors is a neglected field of international law overtaken by the regimes of state responsibility and individual criminal accountability as well as fears of legitimacy yet armed non state actors are important players in the international arena and their activities have significant repercussions this book focuses on their obligations and accountability when they do not function as state agents regardless of the existence or extent of accountability of their individual members the author claims that their distinct features lead to their classification into three different types de facto entities armed non state actors in control of territory and common article 3 armed non state actors the mechanisms that trigger the applicability of humanitarian and human rights law regimes are examined in detail as well as the framework of obligations in both cases the author argues that armed non
state actors should not be treated as entering international law and process exclusively through the state the study concludes by focussing on their accountability in international humanitarian and human rights law and more specifically to the rules of attribution remedies and reparations for violations of their primary obligations lethal autonomous weapons are weapon systems that can select and destroy targets without intervention by a human operator fighting machines explores the relationship between lethal autonomous weapons laws the concept of human dignity and international law much of this analysis speaks to three fundamental and related problems when a laws takes a human life is that killing a violation of human dignity can states and non state actors use laws in accordance with international law and are there certain responsibilities of human decision making during wartime that we should not delegate to machines in the book dan saxon argues that the use of laws to take human life constitutes a violation of human dignity rather than concentrating on the victims of the use of lethal force saxon instead focuses on the technology and relevant legal principles and rules to advance several propositions first as laws operate at increasingly greater speeds their use will undermine the opportunities for and the value of human reasoning and judgment second by transferring responsibility for reasoning and judgment about the use of lethal force to computer software the use of laws violates the dignity of the soldiers commanders and law enforcement officers who historically have made such decisions and therefore breaches international law third weapon designs that facilitate teamwork between humans and autonomous systems are necessary to ensure that humans and laws can operate interdependently so that individuals can fulfil their obligations under international law including the preservation of their own dignity and ensure that human reasoning and judgment are available for cognitive functions better suited to humans than machines fighting machines speaks to the fields of international humanitarian law human rights criminal law and legal philosophy it will also be of interest to non lawyers especially military officers government policy makers political scientists and international relations scholars as well as roboticists and ethicists
This book provides a comparative analysis of the process of breach across ten different European jurisdictions by identifying and elaborating a number of key analytical themes through which the different systems can be compared and evaluated. It is informed by and hopes to advance the research activities of the COST Action IS1106 on offender supervision in Europe, particularly the Action’s work on developing new comparative methodologies to examine the process of decision making involved in the breaching of offenders for non-compliance. This volume consists of country chapters and thematic chapters. Analyses are based on exhaustive reviews of the literature available in each jurisdiction as well as the results of an empirical pilot study to provide a unique and valuable insight into current practice as well as enhancing our understanding of the contingencies and vagaries of the processes of breach as they exist in both civil and common law European jurisdictions. The key themes and emerging concerns that are explored include the roles and responsibilities of the different actors involved in the breach process, the degree and nature of discretion exercised by decision makers, and legitimacy due to process and procedural requirements of breach processes both from a pan-European and from a comparative perspective. This book will be of interest to criminal lawyers and criminologists, policy makers, criminal justice practitioners, probation workers, and students of criminal justice studies across Europe. Comparative insight into the decision-making processes of breach across Europe will also be of interest to American, Canadian, and Australian audiences seeking comparisons with their own systems. This authoritative Apple certified training course is designed both for professionals who support Apple computers as well as Macintosh enthusiasts who want to upgrade service or troubleshoot their favorite systems. Fully revised, this third edition includes Apple’s new models with Intel processors, the MacBook Pro, Mac Mini, and iMac, keyed to the learning objectives of the Apple Desktop Service and Apple Portable
service certification exams this is the companion curriculum used in applecare technician training courses worldwide the book starts out with basic computer theory and underlying technologies then moves on to cover everything from networking to the nitty gritty steps and diagrams for upgrading and troubleshooting six sample computer models dynamic risk assessment is the key tool to support a holistic risk management framework this book aims to help employers managers and staff alike to understand how they can effectively integrate dynamic risk assessment into business management processes and systems to improve safety with tips examples and solutions throughout this multi disciplinary text delivers an effective and comprehensive approach to help you to understand how dynamic risk assessment dra can be integrated into predictive pra and strategic risk assessments sra to enhance your organization s effectiveness the 3 level risk management model fully supports and complements the systematic five steps to risk assessment process a multi disciplinary approach to dynamic risk assessment that covers workers operating in teams and those working alone within the public private and third sectors contains practical examples tips and case studies drawn from a wide range of organizations the book comes with access to downloadable materials from an accompanying website at routledge com cw dynamic risk assessment a multi disciplinary approach to transportation planning fundamentals the transportation planning handbook is a comprehensive practice oriented reference that presents the fundamental concepts of transportation planning alongside proven techniques this new fourth edition is more strongly focused on serving the needs of all users the role of safety in the planning process and transportation planning in the context of societal concerns including the development of more sustainable transportation solutions the content structure has been redesigned with a new format that promotes a more functionally driven multimodal approach to planning design and implementation including guidance toward the latest tools and technology the material has been updated to reflect the latest changes to major transportation resources such as the hcm mutcd hsm and more including the most current ada accessibility regulations transportation planning has historically followed the rational planning model of
defining objectives identifying problems generating and evaluating alternatives and developing plans planners are increasingly expected to adopt a more multidisciplinary approach especially in light of the rising importance of sustainability and environmental concerns this book presents the fundamentals of transportation planning in a multidisciplinary context giving readers a practical reference for day to day answers serve the needs of all users incorporate safety into the planning process examine the latest transportation planning software packages get up to date on the latest standards recommendations and codes developed by the institute of transportation engineers this book is the culmination of over seventy years of transportation planning solutions fully updated to reflect the needs of a changing society for a comprehensive guide with practical answers the transportation planning handbook is an essential reference strategic leadership techniques are the cornerstone to positive growth and prosperity within businesses and organizations implementing new management strategies and practices helps to ensure managers are optimizing their resources and driving innovation the encyclopedia of strategic leadership and management investigates emergent administrative techniques and business practices being utilized within corporate and educational settings highlighting empirical research and best practices within the field this encyclopedia will be an authoritative reference source for students researchers faculty librarians managers and leaders across various disciplines and cultures nontimber forest products ntfps are fundamental to the functioning of healthy forests and play vital roles in the cultures and economies of the people of the united states however these plants and fungi used for food medicine and other purposes have not been fully incorporated into management policy and resource valuation this report is a forest sectorwide assessment of the state of the knowledge regarding ntfps science and management information for u s forests and rangelands and hereafter referred to as the ntfp assessment the ntfp assessment serves as a baseline science synthesis and provides information for managing nontimber forest resources in the united states in addition this ntfp assessment provides information for national level reporting on natural capital and the ecosystem services ntfps provide the report also provides
technical input to the 2017 national climate assessment nca under development by the u s global change research program usgcrp a new edition of this best selling textbook reintroduces the topic of library cataloging from a fresh modern perspective not many books merit an eleventh edition but this popular text does newly updated introduction to cataloging and classification provides an introduction to descriptive cataloging based on contemporary standards explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today the text opens with the foundations of cataloging then moves to specific details and subject matter such as functional requirements for bibliographic records frbr functional requirements for authority data frad the international cataloging principles icp and rda unlike other texts the book doesn t presume a close familiarity with the marc bibliographic or authorities formats ala s anglo american cataloging rules 2nd edition revised aacr2r or the international standard bibliographic description isbd subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification in addition the book introduces marc bibframe and other approaches used to communicate and display bibliographic data discussions of formatting presentation and administrative issues complete the book questions useful for review and study appear at the end of each chapter towards a digital health ecology nhs digital adoption through the covid 19 looking glass is about technology adoption in the uk s national health service nhs as told from the inflection point of a disaster in 2020 the world lived through a disaster of epic proportions devastating humanity around the globe it took a microscopic virus to wreak havoc on our healthcare system and force the adoption of technology in a way that had never been seen before this book tells the story of digital technology take up in the nhs through the lens of that disaster this book documents use of technology in the nhs through the lens of the first pandemic shock our healthcare system paid for by general taxation and free at the point of demand was conceived and developed in a firmly analogue world created in 1948 the nhs predates the invention of the world wide by some forty years this is
not a book simply about technology it is a study of the painful process of reengineering a mammoth and byzantine system that was built for a different era the digital health sector is a microcosm of the wider healthcare system through which grand themes of social inequality public trust private versus commercial interests values and beliefs are played out the sector is a clash of competing discourses the civic and doing good for society the market and wealth creation the industrial creating more efficient and effective systems the project expressed as innovation and experimentation lastly the notion of vitality and leading a happier healthy life each of these discourses exists in a state of flux and tension with the other this book is offered as a critique of the role of digital technologies within healthcare it is an examination of competing interests approaches and ideologies it is a story of system complexity told through analysis and personal stories the digital government review of romania evaluates the efforts made by the government to transition towards digital government it provides in depth analysis and actionable policy recommendations to improve institutional governance digital investments digital talent and skills government service delivery and the strategic use of data including open government data the encyclopedia of library and information sciences comprising of seven volumes now in its fourth edition compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries this major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or online the new fourth edition which includes 55 new entries and 60 revised entries continues to reflect the growing convergence among the disciplines that influence information and the cultural record with coverage of the latest topics as well as classic articles of historical and theoretical importance covering the applied managerial perspective of the travel industry this book looks at the core disciplines and the application of theory to practice considering individual and corporate social responsibility it teaches effective managerial skills by reviewing legal frameworks quality management and marketing financial management and the management of shareholders and stakeholders it discusses current trends such as sustainability and governmental emission targets against a background
of the needs of a commercial business to innovate and increase profits a valuable tool for both students and those working in the travel industry this new edition includes new content a revised structure and all new international case studies this book describes in detail the scientific philosophy of the formation and stabilization destabilization of foams it presents all hierarchical steps of a foam starting from the properties of adsorption layers formed by foaming agents discussing the properties of foam films as the building blocks of a foam and then describing details of real foams including many fields of application the information presented in the book is useful to people working on the formulation of foams or attempting to avoid or destruct foams in unwanted situations native plants are a foundation of ecological function affecting soil conservation wildlife habitat plant communities invasive species and water quality establishing locally adapted self sustaining plant communities can also support transportation goals for safety and efficiency past obstacles to establishing native plant communities on roadsides have been technical informational and organizational effective strategies and practical techniques for revegetating the disturbed conditions with limited resources must be made available to practitioners multiple disciplines ranging from engineering to soil science ecology botany and wildlife science must be able to work cooperatively not in isolation this report offers an integrated approach to facilitate the successful establishment of native plants along roadsides and other areas of disturbance associated with road modifications it guides readers through a comprehensive process of 1 initiating 2 planning 3 implementing and 4 monitoring a roadside revegetating project with native plants the trade policy review mechanism a permanent feature of the world trade organization wto is designed to contribute to improving adherence by all wto members to rules disciplines and commitments made under the multilateral trade agreement this volume in the series provides information on the trade policies practices and macroeconomic situations of australia each trade policy review is expertly prepared after in depth analysis of an individual nation by the wto s trade policy review board this annual report monitors and evaluates agricultural policies in 54 countries including the 38 oecd countries the five non oecd eu
member states and 11 emerging economies. This year’s report focuses on policy responses to the COVID-19 pandemic and analyses the implications of agricultural support policies for the performance of food systems. How does the use of military drones affect the legal, political, and moral responsibility of different actors involved in their deployment and design? This volume offers a fresh contribution to the ethics of drone warfare by providing the first time a systematic interdisciplinary discussion of different responsibility issues raised by military drones. The book discusses four main sets of questions: first, from a legal point of view, we analyse the ways in which the use of drones makes the attribution of criminal responsibility to individuals for war crimes more complicated and what adjustments may be required in international criminal law and in military practices to avoid responsibility gaps in warfare. From a moral and political perspective, the volume looks at the conditions under which the use of military drones by states is impermissible, permissible, or even obligatory, and what the responsibilities of a state in the use of drones towards both its citizens and potential targets are. From a socio-technical perspective, what kind of new human-machine interaction might and should drones bring and which new kinds of shared agency and responsibility finally we ask how the use of drones changes our conception of agency and responsibility. The book will be of interest to scholars and students in military ethics and to those in law, politics, and the military involved in the design, deployment, and evaluation of military drones. Adolescents have unique nutritional needs when compared to young children and adults as they go through physical, cognitive, and behavioral development. Nutrition needs are dynamic and changing if these needs go undetected and remain unaddressed, the results can derail physical and social maturation and include lifelong effects on health. This comprehensive text offers a multidisciplinary perspective on aspects of adolescent nutrition using clinical cases. It covers relevant topics related to adolescent health including normal development, chronic health conditions, and complex biopsychosocial dynamics among others. The first section of the text contains an overview of adolescent nutrition that is further broken down into more specific topics such as developmental nutrition needs, needs of active youth and...
athletes and media influences on body image the next section focuses on health disparities such as culturally appropriate care health equity international considerations and food insecurity the following section specifically addresses eating disorders ranging from anorexia and bulimia to binge eating finally the last section covers additional health considerations such as polycystic ovarian syndrome teen pregnancy substance use and gender non conforming youth written by experts in the field this book is a helpful resource for primary care medical providers registered dietitians nutritionists rdn adolescent medicine specialists as well as advanced practice nurses physician assistants psychologists licensed social workers and certified athletic trainers div procurement of information and communication technologies ict plays a decisive role not only in public service delivery but in public sector modernisation this report takes stock of current ict procurement practices in the slovak republic and provides evidence based strategic policy advice for the slovak government on how to adopt more innovative and agile approaches in ict procurement this text shows the reader how to plan and develop a restaurant or foodservice space topics covered include concept design equipment identification and procurement design principles space allocation electricity and energy management environmental concerns safety and sanitation and considerations for purchasing small equipment tableware and table linens this book is comprehensive in nature and focuses on the whole facility with more attention to the equipment rather than emphasizing either front of the house or back of the house this book provides a vision for environmentalism s future based on the success of environmental entrepreneurs around the world the work provides the next generation of environmental market ideas and the chapters are co authored with young scholars and policy analysts who represent the next generation of environmental leaders necessity and proportionality occupy a firm place in the international law governing the use of force by states perhaps most importantly for practical purposes the exercise of the right of self defense as recognized in article 51 of the united nations charter is subject to the requirements of necessity and proportionality as the international court of justice determined in the nicaragua case necessity and
proportionality are also firmly anchored in the international law governing armed conflicts in its nuclear weapons advisory opinion the international court of justice even referred to one articulation of the idea of necessity that directed against the causing of unnecessary suffering as one of two cardinal principles of this body of law however beyond statement in such general terms the realms of uncertainty and controversy soon begin it is far from clear for example how to distinguish with precision between necessity and proportionality in the international law on self defense and in immediate connection herewith what it means precisely to say that forcible action taken in the exercise of self defense must be proportionate it is all the less clear what legal significance if any necessity and proportionality possess in other contexts of the international law governing the use of force the relationship between autism and eating disorders is often overlooked or misunderstood written by two experienced clinicians working with young people autism and eating disorders in teens covers topics including identification of both conditions diagnosis and the recovery process challenging current thinking and promoting new ways of working to promote treatment and awareness autism and eating disorders often present in similar ways whether through restrictive or selective eating behaviours or rigid or obsessive thought patterns as a result individuals may receive treatment for one condition with the other although present going undiagnosed this is a practical guide for the adults supporting this group of teens recommending changes in policy and practice in order to improve the care of young people experiencing these conditions drawing on in depth case studies highlighting the need for young people and their families to feel understood and listened to the authors show how we can empower these young people to reach their full emotional and physical potential

**Black Hills National Forest (N.F.), Travel Management Plan** 2013-09 procurement of information and communication technologies ict plays a decisive role not only in public service delivery but in public sector modernisation this report takes stock of current ict procurement practices in the slovak republic and provides evidence based strategic policy advice for the slovak government on how to adopt more innovative and agile approaches in ict procurement

**Federal Register** 2016-02-26 this text shows the reader how to plan and develop a restaurant or foodservice space topics covered include concept design equipment identification and procurement design principles space allocation electricity and energy management environmental concerns safety and sanitation and considerations for purchasing small equipment tableware and table linens this book is comprehensive in nature and focuses on the whole facility with more attention to the equipment rather than emphasizing either front of the house or back of the house

**Operations Management in the Travel Industry, 2nd Edition** 2018-07-27 this book provides a vision for environmentalism s future based on the success of environmental entrepreneurs around the world the work
provides the next generation of environmental market ideas and the chapters are co-authored with young scholars and policy analysts who represent the next generation of environmental leaders.

**Foam Films and Foams** 2007

necessity and proportionality occupy a firm place in the international law governing the use of force by states. Perhaps most importantly for practical purposes the exercise of the right of self-defense as recognized in Article 51 of the United Nations Charter is subject to the requirements of necessity and proportionality as the International Court of Justice determined in the Nicaragua case. Necessity and proportionality are also firmly anchored in the international law governing armed conflicts in its nuclear weapons advisory opinion. The International Court of Justice even referred to one articulation of the idea of necessity that directed against the causing of unnecessary suffering as one of two cardinal principles of this body of law. However, beyond statement in such general terms the realms of uncertainty and controversy soon begin. It is far from clear, for example, how to distinguish with precision between necessity and proportionality in the international law on self-defense and in immediate connection herewith what it means precisely to say that forcible action taken in the exercise of self-defense must be proportionate. It is all the less clear what legal significance if any necessity and proportionality possess in other contexts of the international law governing the use of force.

**Roadside Revegetation** 1996

The relationship between autism and eating disorders is often overlooked or misunderstood. Written by two experienced clinicians working with young people, autism and eating disorders in teens covers topics including identification of both conditions, diagnosis, and the recovery process. Challenging current thinking and promoting new ways of working to promote treatment and awareness, autism and eating disorders often present in similar ways whether through restrictive or selective eating behaviours or rigid or obsessive thought patterns. As a result, individuals may receive treatment for one condition with the other although present going undiagnosed. This is a practical guide for the adults supporting this group of teens, recommending changes in policy and practice in order to improve the care of young people experiencing these conditions. Drawing on in-depth case studies, highlighting the need for young people and their families to
feel understood and listened to the authors show how we can empower these young people to reach their full emotional and physical potential
